True Cinema

The new must-have on a yacht, the True Cinema – a ten-person true 3D cinema for a large superyacht being built in Europe – is in the final stages from Advanced New Technologies (ANT). ANT says that the combination of new technologies, with a comprehensive understanding of the room size, shape acoustics and positioning requirements, will enable the yacht owner and guests to enjoy a spectacular true cinema experience that recreates the on-screen action and subtle details of the film's sound effects, musical score and dialogue. Some of the latest developments in cinema are being incorporated into ANT's current designs, such as 4K HD and 3D movie reproduction.

ANT are using the latest technical equipment from leading manufacturers such as Kinton, Christie, Bowers & Wilkins and Classe & Stewart for the installation; but as if all that wasn't enough to guarantee quality ANT's specialist AV designers are working with the yacht designer, architect, owner and equipment manufacturers to specify, source and install the entire system, as well as providing on-going support.
