Trial Speed: 17.4 knots
Range: 5500nm

Accommodation

Owner and Guests: 16
(owners suite, VIP suite and guest cabins)
Crew: 22 (11 cabins)

One of ANT's most recent projects is the Lady Anne, a breathtaking super yacht that offers luxurious cruising. Built to the highest standards and designed by the late Walter Franchini, the international build team reads like a "Who's Who" of yachting. Seahorse Design Group for the hull profiling, cabinetry by Ludwig and Dominique of Paris, interior outfitters Metrica, Heinen and Hopman for air conditioning and of course ANT.

The owner tasked ANT with creating an entertainment, communications, IT and control system that could be easily operated by guests or crew but offered all the advantages and performance of leading edge technology.

This Case Study gives you a full breakdown of the equipment and services supplied by ANT for this award winning super yacht (Showboats International – Outstanding Achievement in Motor Yachts Award 2006).
